Everlast Scholarship Cooperation (ESC)

Everlast Scholarship Cooperation programme is fully funded by Everlast Golden Electric Indonesia, henceforth EGE Indonesia. As an electrical company focusing on Light Emitting Diode (LED) lighting products, EGE Indonesia intends to focus on the innovation and distribution of products that make life better and comply with environmental laws, regulations and other requirements. Another aspect including commitment to community advancement, is perceived by Everlast Scholarship Cooperation programme, starting from Fall 2022.

The ESC programme adapts custom-scholarship system based on an emancipatory agreement which enables related parties to be certain of their contribution and their benefits. The programme is designed for any profit, non profit organisation, and institution, that relies on affiliate partnership.

Core Values:

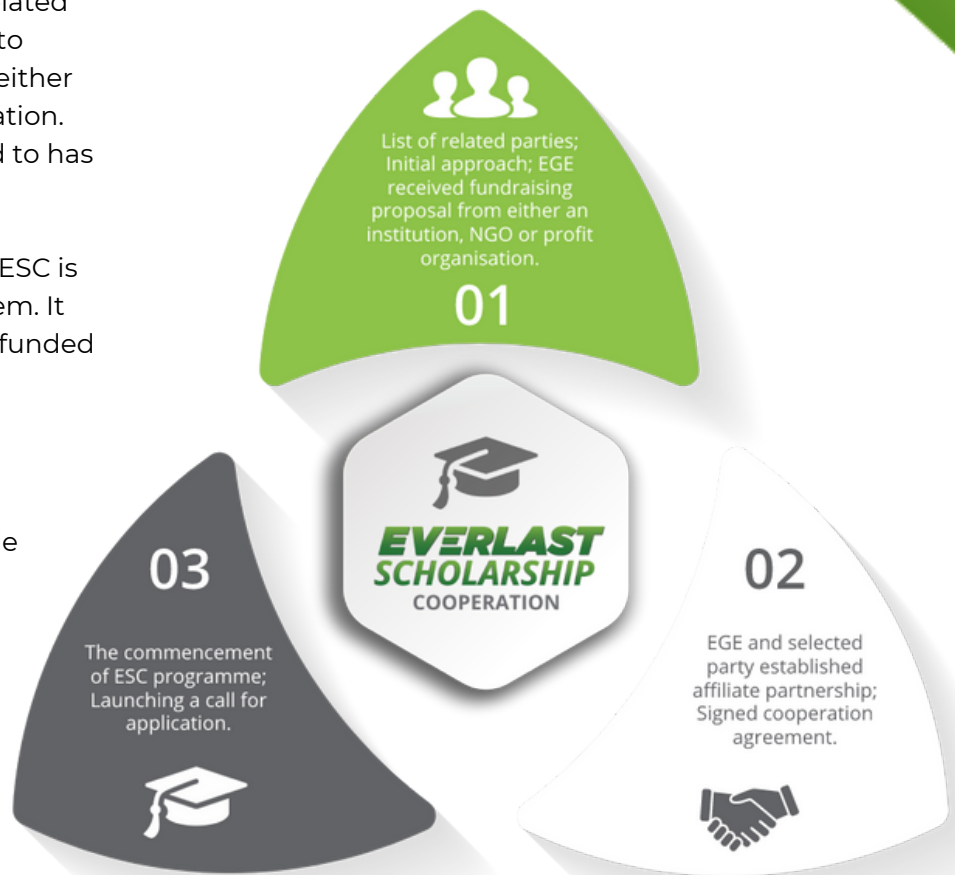

- LED lighting products innovation
- Environmental Sustainability
- Community Advancement

Everlast Scholarship Cooperation (ESC) Standard Scheme

Once an initial approach between related parties is settled, EGE looks forward to receive a fundraising proposal from either an institution, NGO or profit organisation. The fundraising proposal is expected to have all the elements needed for further consideration. Be sure to include all pertinent details and documents as ESC is based on a custom-scholarship system. It can be a request for partially or fully funded scholarship.

• Everlaster

EGE will then select the most suitable partner(s) and establish affiliate partnership. EGE and the affiliated partner(s) sign a cooperation agreement and start calling for an application.

Core Values:

- LED lighting products innovation
- Environmental Sustainability
- Community Advancement
